

## Founder & CTO, ShadowCradle · CEO, Takelan · VP of Engineering, CyberFOX

Software Engineer, Founder & CTO of ShadowCradle and CEO of Takelan. Linux evangelist and problem solver, building products across backup, disaster recovery, and self-hosted services.

### EXPERIENCE

#### VP of Engineering, CyberFOX LLC

Jun 2022 to Present

Cybersecurity products for MSPs and consumers. On the leadership team; build and manage dev teams across local and near-shore groups and drive KPIs. Help ship brand-new products, from specs to delivery across the whole dev cycle. Consultant for PasswordBoss before this (Feb 2021 to Jun 2022).

#### Founder & CTO, ShadowCradle

2025 to Present

Enterprise-grade backup and disaster recovery for MSPs: one appliance, all workloads. Founded the company and lead its technology: VM, database and cloud-app backup, ransomware scanning, isolated recovery virtualization, and a multi-tenant cloud platform. Own architecture, roadmap, and the engineering org end to end.

#### Founder & CEO, Takelan

2010 to Present

Company I started in 2010, parent of ShadowCradle. Builds and operates multiple products and self-hosted services. As CEO I set direction across the portfolio, lead the leadership team, and keep engineering, infrastructure, and business aligned.

#### Escalation Manager, Axcient Inc.

Jul 2017 to Feb 2021

Continued prior Sr. Software Engineer work while aligning team members with priority situations. Made sure critical partners received immediate solutions and resolved non-development issues partners faced.

#### CTO, Board Advisory Member, Armor Bionics Inc.

May 2005 to Aug 2021

As advisor, provide the executive team improved solutions to align budget with technical requirements. As part-time CTO, lead adoption of new technologies, new hires, and keep development aligned with company goals.

#### Software Engineer, Replibit

Mar 2015 to Feb 2016

C/C++ on Linux (block-level translator for GPT volumes adding UEFI and GPT support), Python, a .NET Windows backup agent, and virtualization support for EFI systems and secure boot. Grew the team with offshore resources in Uruguay and consulted for third-party customers.

### PRODUCTS I HAVE BUILT

#### CyberFOX DNS Filter

Architect

DNS and phishing protection built from scratch: Anycast resolver network, one agent speaking DoH, DoT, and Do53, AI domain scoring, and packet-level anti-circumvention.

#### ShadowCradle

Founder & CTO

Backup and DR for MSPs. One appliance protects every workload, scans each backup for ransomware, and detonates suspect machines in an air-gapped sandbox.

#### TakeLAN product suite

Founder & CEO

AuthNox, ConfiDox, DeployYX, Monitora, CheckDNS, Firecradle, Vcradle, and ProfileGuardian: zero-knowledge, self-hosted infrastructure tools.

### SKILLS

Software Engineering   Software Architecture   Linux  
Python   C   C++   Node.js   Kubernetes  
Docker   DevOps   Cloud Infrastructure  
Self-hosting   Cybersecurity   Disaster Recovery  
Business Continuity   Virtualization

### EDUCATION

Universidad ORT Uruguay

### CERTIFICATIONS

Microsoft Certified Professional  
Issued Feb 2013, Credential ID 7-B-2682  
Ex-Microsoft MVP.

### LANGUAGES

English, Spanish
